SKILLS

Programming Languages : Python, JavaScript, TypeScript, HTML, CSS, C#

Frontend Framework & Libraries : ES6+, React, NodeJS, NextJS, Tailwind CSS, AngularJS, GraphQL

Tools & IDE : Git, Jest, Figma, Bash, Postman, Vscode, Cypress, Playwright

Cloud & DevOps : Terraform, GCP, Azure, AWS, GitHub Actions, CI/CD(Jenkins), Docker

Databases & OS : MySQL, MongoDB, Supabase, PostgreSQL, Windows, Linux, macOS

WORK EXPERIENCE

Founding Engineer | [NegotiateAI](#) | California, USA

May 2025 - Present

- Built and deployed **AI agents** that automate vendor outreach, quote collection (RFQs), and negotiation workflows, reducing manual procurement effort by **60 %**
- Designed and implemented **price intelligence algorithms** to detect savings opportunities, price variance, and vendor inefficiencies across large-scale procurement datasets
- Developed **multi-source product search and matching systems** (catalog + supplier data) enabling real-time comparison across vendors, improving cost optimization decisions
- Led end-to-end architecture using **Next.js, TypeScript, Supabase, PostgreSQL, and LLM APIs**, integrating structured (catalog/ERP) and unstructured (emails, PDFs) data pipelines

Co-Founder & Full-Stack Engineer | [Donna](#) | California, USA

January 2025 - April 2025

- Co-founded and led the development of **Donna**, an AI-powered legal assistant that leverages **LLMs, real-time chat, and voice** to guide users through immigration workflows
- Integrated **OpenAI APIs** to deliver natural, contextual responses across text and voice interfaces, using **WebRTC** for real-time video interactions and Supabase for authentication and database operations
- Achieved **1,500+** users in the first month and over **25,000** unique visitors through product-led growth, showing real-world traction and execution under pressure

Software Engineer Intern | Mueshi Incorporated | Boston, USA

January 2024 - September 2024

- Developed a **React + TypeScript** admin dashboard used internally to track campaign performance and user metrics, resulting in a 25% increase in engagement
- Architected RESTful APIs to integrate **Stripe** and **PayPal**, handling **\$200K+** in monthly transactions with robust error handling and system optimization
- Led 5-person team building and implementing Shopify app using Polaris, **TypeScript**, React and GraphQL for 35+ stores

Full Stack Software Engineer | Vertscend Automation | Pune, India

March 2020 - June 2022

- Led development of e-commerce web platform serving **10k+** active users, building both customer-facing website and internal management applications using React, Node.js and TypeScript
- Developed multiple **Python** and **bash** automation scripts to streamline manual processes using internal APIs.
- Reduced deployment time by 20% by setting up a **CI/CD pipeline** with Jenkins and improved system reliability through monitoring and alerting using **AWS CloudWatch**

Founder, Full Stack Developer | Marketing Benz | Pune, India

April 2018 - August 2020

- Founded a media company serving clients in **health, tech, and finance**, growing revenue from zero to **\$10,000**
- Led team of 7 delivering marketing and web projects, driving technical decisions and exceeding client expectations

PROJECTS

AI Quality Assurance Agent | (TypeScript, NextJS, React, OpenAI, Playwright, Supabase)

December 2024 - January 2025

- Developed an AI-powered QA automation platform that converts user-provided descriptions into detailed Playwright test scripts using OpenAI, enabling automated website testing with video and screenshot capture
- Built a scalable web application using NextJS, ReactJS, and Supabase, implementing server-side logic for dynamic test generation, real-time reporting, and integration with **Playwright** for test execution and media capture

EDUCATION

Northeastern University | Boston, MA

September 2022- December 2024

Master of Science in Information Systems

Pune University | Pune, India

August 2018 - September 2022

Bachelor of Engineering in Computer Engineering
